INTRODUCTION

This policy document has been prepared to define the way that Air³ Limited intends to manage health and safety and meet the requirements of Section 2(3) of the Health and Safety at Work etc. Act 1974.

This act requires an employer to prepare a statement of general policy with respect to health and safety at work and the organisation and arrangements set up to carry out that policy.

Air³ Limited's health, safety and environmental management document system is contained within this policy document and its associated instructions, assessments and guidance documents.

The document system formally communicates the instructions and procedures covering operation and work activities from the Company Director(s) to their supporting managers and supervisors and all other personnel employed or involved in the Company's activities.

The document system has been developed to meet statutory requirements for a safety management system to ensure the health and safety of all personnel associated with work activities of the Company, including contractors, visitors and the general public.

The policy and its associated documents apply as defined to all personnel employed or contracted to Air³ Limited as appropriate to the work being undertaken.

It is the duty of personnel so involved to apply the requirements of these documents to their work.

HEALTH AND SAFETY POLICY STATEMENT

In every activity of its business, Air³ Limited is fully committed to minimising the risk of injury or ill health to people and damage to property or the environment.

Air³ Limited fully accepts its moral and legal obligations to safeguard, so far as is reasonably practicable, the health, safety and welfare of its employees and anyone who may be affected by the actions of the Company and its employees.

The Company will set standards to comply with the relevant statutory requirements relating to health, safety and welfare with regard to the effect on employees, contractors, visitors and the public.

Air³ Limited will:

- Meet its responsibilities as an employer to do all that is reasonably practicable to prevent accidents, injuries and damage to health.
- Provide and maintain safe working environments that minimise the risks to health, safety and welfare.
- Ensure all employees play an active part in the health and safety of the Company by consulting with them and providing them with adequate information, instruction, training and supervision so they can understand their role within the Company.
- Safeguard employees and others from foreseeable hazards connected with work activities, processes and working systems.
- Ensure that:
 - hazardous areas are kept secure from the public, employees, tenants or contractors not required to enter them;
 - adequate guidance, instruction, training and supervision are provided for safe methods of work to be developed when new substances, plant, machinery, equipment, processes or premises are introduced;
 - all plant and equipment is maintained in a safe condition and is subject to routine and statutory inspections and examinations;
 - contractors working for the Company are informed of the relevant standards required and are monitored to ensure compliance without detracting from the contractors' legal responsibilities to comply with statutory requirements.

The Company will communicate the Health and Safety Policy to all employees and it will be freely available to customers and the general public. This policy will be reviewed annually and updated as required to conform to current legislation.

Employees are required to cooperate with the Company to ensure their personal safety and to ensure they are not prosecuted for breach of legislation nor have disciplinary action taken against them by the Company for breach of company rules.

This policy, supported by instructions, procedures and organisational arrangements will be applied to all activities carried out by the Company.

All employees and contractors will enforce this policy. The Managing Director is personally responsible for the health and safety performance of the Company and signs this policy statement in acknowledgement of this.

HEALTH AND SAFETY ETHICS POLICY STATEMENT

We encourage all of our managers to support all aspects of health and safety and to influence, support and help implement the strategies and plans that are beneficial to the business, its employees and the environment.

We will ensure that there is a dedicated focus on integrating diversity and inclusion in all of our business activities, supporting wellbeing, mental health support and developing and supporting progression of employees to reach their potential.

We will monitor and support the changing demographics in the workplace, embracing diversity and inclusion, disability and return-to-work programmes and rehabilitation where applicable.

Contemporary good health and safety practice involves identifying any workplace ethical issues, individual and corporate responsibilities and any challenges that could compromise health and safety within the business.

At Air³ Limited we firmly believe that ethical decision making including key considerations of weighing up the benefits against harm to health is an essential component of good ethical health and safety practices along with the consideration of justice, virtue and human rights.

All of our managers and any external consultants we engage with play a critical role in our organisation and positioning of ethical management, which is a key component of sustainability. We believe that this is an essential ingredient in building trust and both employee and customer confidence in Air³ Limited and its business practices and brand.

Our health and safety management systems encourages us to source local raw materials and suppliers where possible.

We will also consider our external relations and the positive impression that our business can have on our local communities and customers. We will work with local charities and communities to identify social sustainability programmes and to identify any local causes and projects that can be benefited by engaging with local stakeholders and communities.

ENVIRONMENTAL POLICY STATEMENT

As a consumer of resources Air³ Limited recognises its responsibility to future generations. Acknowledging its contribution to the growing global environmental burden, it will follow business practices that promote sustainable development.

Our Environmental Policy must earn the confidence of employees, customers and the general public by demonstrating our commitment to complying with relevant environmental legislation and minimising pollution, resource use and waste through the continual improvement of performance in all areas of the Company.

To achieve good environmental management we will:

- Identify every way in which the Company impacts on the environment;
- Monitor and review environmental impacts and emissions to comply with regulations and our environmental aspirations;
- Demonstrate control of all our operations and ensure that all are performed with due consideration of the environment, including managing the impact of our transport activities;
- Consistently increase the awareness and provide necessary training, briefings etc. to all our employees and to ensure environmental responsibility is integrated into normal working practices;
- Work with our clients to share environmental awareness and good practice;
- Seek to use products that have the least possible environmental impact;
- Separate electrical equipment and apparatus to conform to WEEE Regulations;
- Minimise the storage and use of all articles and substances;
- Reduce our consumption of resources (energy, materials, packaging), where feasible;
- Minimise waste through a commitment to re-use, recover or recycle and comply with the waste management plans and policies of clients;
- Identify routes for the storage, transfer and disposal of controlled waste under Duty of Care;
- Identify, prevent and mitigate against potential accidents that could result in an environmental impact, so that if an accident did occur the consequences would be minimised;
- Introduce procedures to minimise pollution;
- Introduce procedures to prevent water wastage, pollution of surface water, water courses and drains;
- Limit or restrict noise pollution;
- Promote continual improvement by regularly monitoring and reviewing our environmental performance.

It is our duty to ensure that good environmental management is practised in all projects that we are involved in and we will seek to influence customers to demonstrate a positive environmental commitment.

The Company will communicate the Environmental Policy to all company employees and contractors. It will be freely available to customers and the general public.

All employees and contractors will enforce this policy. The Managing Director is personally responsible for the environmental performance of the Company and signs this policy statement in acknowledgement of this.

CORPORATE RESPONSIBILITY POLICY STATEMENT

Our policy is to invest in our people, our customers, our suppliers and our environment for the good of the wider community, fully complying with UK law and wherever possible meeting higher standards than current legislation.

Air³ Limited is committed to investing in a sustainable future. We recognise that our actions may have a wider impact on the environment and the local community. We aim to make a positive contribution to environmental protection and social progress.

Our Customers and Suppliers

We will provide a good quality of service to our customers, meeting all contractual and moral obligations. We will consider the health and safety of our customers and others who may be affected by our work. The Company will engage with suppliers to adopt policies and practices similar to its own.

Our Employees

The Company will help employees to develop their potential by investing in their skills and capabilities. We will consult with them on a regular basis, taking into consideration their personal needs when making decisions.

We will provide employees with fair remuneration for their work, treat them fairly and not discriminate against any individuals because of their gender, race, ethnic origins, religion or sexual orientation.

The Company will provide a safe working environment and ensure that it complies with all employment and health and safety legislation.

Our Environment

The Company will improve environmental awareness generally in consultation with employees, suppliers and customers.

We will work in partnership with customers and suppliers to consider the use of new materials and methods of work that may lead to more sustainable solutions in the provision and outcome of our services.

We will ensure compliance with all environmental legislation as it affects our business and endeavour to reduce the impact that our business may have on the environment year by year.

Our Community

Air³ Limited will work to minimise any environmental effect the business may have on the local community and show due consideration to immediate neighbours by operating in a way that does not affect their health and safety.

We will encourage participation in projects or schemes that may improve the wellbeing of the local community and, as far as possible, support local companies in the course of our business activities.

All Directors, managerial and supervisory staff will enforce this policy. The Managing Director is personally responsible for the corporate social responsibility of the Company and signs this policy statement in acknowledgement of this.

WORKSAFE POLICY STATEMENT

Air³ Limited aims to provide a safe working environment and safe system of work which, so far as is reasonably practicable, is free from risk to employees, contractors and those affected by their actions or omissions. The Company, by means of our Worksafe Policy, will support any employee who refuses to work on legitimate grounds of risks to safety or health provided they invoke the worksafe process as detailed below.

Before any work shall commence a suitable and sufficient risk assessment shall be carried out in line with the Company health and safety policy. Suitable training and supervision will be provided to ensure all company staff are competent in the works they are undertaking. The Company does not expect any employee or contractor to undertake any duties unless they are competent and trained. No employee, or anyone working on behalf of the Company, is expected to carry out any task where the risk to themselves or any other person is considered unacceptable. Under the Worksafe Policy, each member of staff has the right to refuse to carry out work if they feel it is not safe to do so. Refusal to work on the grounds of health and safety is free from disciplinary action and will not affect in anyway their future prospects within the Company. All refusals to work will be responded to promptly and the employee will be involved in the consultation and discussion process regarding safe working practices.

Any situation leading to an individual or individuals refusing to work for health and/or safety reasons must be reported immediately. In the first instance they must report the issue to the line manager or a member of the senior management team. The reason for ceasing work must be given. The person in charge must then discuss with the employee, and make an assessment of the situation and decide on a suitable course of action. A revised risk assessment and method statement will be issued (where applicable) with additional control measures in place to allow work to be restarted. If an agreement cannot be made no work will commence and the issue must be reported to the Site Manager for further action.

Employees and contractors should always work safely and in accordance with any applicable rules, regulations, procedures or instructions, if necessary, intervening to stop unsafe acts or practices. Supervisors and managers shall be responsible for the safety of any work undertaken under their direct control.

They should:

- have a safe system of work in place for any activity undertaken under their direct control,
- check that any employee or contractor's employee who they request to undertake work is competent, certified and suitably equipped to do so,
- take action as necessary to remedy any unsafe acts or conditions identified,
- work with health and safety representatives to identify and minimise unsafe conditions, behaviours and acts,
- review, resolve and report any refusals to work on grounds of safety and health.

The Contracts Manager is responsible for ensuring that all work is undertaken in a safe manner, and that any refusal to work on the grounds of health and safety is fully investigated and closed out satisfactorily. Ultimately, Peter Morgan has authority to determine how an issue is resolved. All staff and contractors have the right to raise concerns about health and safety without fear of discrimination. Supervisors and managers will never discriminate against individuals who raise safety concerns. All situations where the Worksafe Policy has been raised will be reported to senior management.

ANTI-FRAUD AND BRIBERY POLICY STATEMENT

The reputation of Air³ Limited for lawful and responsible business behaviour is of paramount importance and is one of its greatest assets. The Company is committed to the prevention, deterrence and detection of fraud, bribery and all other corrupt business practices as outlined in the Bribery Act 2010.

The Company has zero tolerance towards such behaviour. Losses due to fraud, bribery and all other corrupt business practices can be more than just financial in nature; they can potentially damage the Company's reputation as well.

The Company expects all employees and contractors and suppliers to:

- Act honestly and with integrity at all times and safeguard the Company resources for which they are responsible;
- Respect our customers, suppliers and other parties with whom it must interact to achieve its objectives by conducting business in an ethical, lawful and professional manner.

Within the Company, the responsibility to control the risks of unethical business practices occurring resides at all levels of the organisation.

The Company prohibits unethical conduct. We will:

- Communicate a code of conduct to employees;
- Report and investigate allegations of fraud, bribery and other corrupt practices;
- Apply appropriate disciplinary procedures for employees who are found to have engaged in such practices;
- Monitor the effectiveness of such controls.

We will endeavour to take appropriate steps to ensure that all employees and contractors and suppliers:

- Meet all legal and regulatory requirements governing the lawful and ethical conduct of business;
- Ensure all breaches or suspected breaches are fully investigated and if appropriate, invoke disciplinary measures and take prompt action to remedy the breach and prevent any repetition;
- Provide information to all employees and further guidance if they have any questions or uncertainty regarding these requirements;
- Provide information to all employees on the procedures available to them to report any breach or suspected breach.

The Company expects that employees, contractors and suppliers do not engage in any illegal, improper or questionable conduct.

They must not receive, offer, promise, improperly influence payment, authorise payment or contract award (directly or indirectly) in return for anything of value, for example a bribe/kickback.

They must:

- Prohibit payments including 'facilitating' or 'expediting' payments to others in order to secure prompt or proper performance of routine duties;
- Prohibit the use of purchase orders or consulting agreements which channel payments or otherwise improperly reward customers or suppliers or their relatives or business associates; Ensure transactions are properly and accurately recorded.

Signed

WELL-BEING POLICY STATEMENT

Air³ Limited recognises that our employees are our biggest commodity, and as their health and well-being is vitally important, it makes good business sense for us to help employees manage this to the best of our ability.

Making healthier choices is ultimately up to all of us as individuals, however as an employer, there's a huge opportunity for Air³ Limited to help everyone by encouraging and adopting healthier behaviours to enable our workforce to live and work productively.

Our statement of intent addresses our obligations under the Health and Safety at Work Act etc 1974, The Equality Act 2010 and The Equality and Human Rights Commission (EHRC) which are relevant pieces of legislation covering occupational health, safety and well-being in the workplace. It also helps us to comply with other relevant statutory provisions, including The Management of Health and Safety at Work Regulations 1999 by recognising mental health and well-being as a risk and having suitable assessments and controls in place.

We recognise that well-being consists of a number of factors such as physical, psychological and social, that will contribute to a healthier life. We have a duty of care to protect our employees general well-being, both mental and physical and reduce stigma and discrimination.

We will do this by:

- Risk assessing - Identifying areas of risk to physical and mental health so that they can be minimised and managed appropriately. Prevention and early intervention are key and assist recovery.
- Appoint a well-being lead from our senior leadership team.
- Promoting a positive mental health culture of care and concern for our employees, which insists that everybody accepts responsibility for their own and others' well-being.
- Promoting a culture of open conversation so we talk about our well-being and mental health, encouraging peer to peer support (well-being champions) and make additional support available when employees may be struggling.
- Provide access to mental health training aimed at providing people with tools for managing their own well-being, including enhanced training for line managers.
- Commit to promoting positive mental health in the workplace by communicating our statement of intent.
- Put in place a system of management practice and controls, which enables employees to enjoy a healthy work-life balance, whilst recognising the impact of personal choice and lifestyle.
- Ensuring the promotion and maintenance to the highest degree of physical, mental and social well-being of employees in all areas of the business.
- Ensure working environments are suitable, healthy, safe, and secure.
- Taking reasonable steps to enable people with disabilities to carry out the role for which they are employed.
- Communicate updates and our commitment to promoting positive mental health to our employees.

EQUAL OPPORTUNITIES POLICY STATEMENT

Introduction

Air³ Limited recognises that it is essential to provide equal opportunities to all persons without discrimination. This policy sets out the organisation's position on equal opportunity in all aspects of employment, including recruitment and promotion, giving guidance and encouragement to employees at all levels to act fairly and prevent discrimination on the grounds of sex, race, marital status, part-time and fixed term contract status, age, sexual orientation or religion. This policy statement recognises compliance to the Equality Act 2010.

Statement of policy

- (a) It is the policy of Air³ Limited to ensure that no job applicant or employee receives less favourable treatment on the grounds of sex, race, marital status, disability, age, part-time or fixed term contract status, sexual orientation or religion, or is disadvantaged by conditions or requirements that cannot be shown to be justifiable. The organisation is committed not only to its legal obligations but also to the positive promotion of equality of opportunity in all aspects of employment.
- (b) The organisation recognises that adhering to the Equal Opportunities Policy, combined with relevant employment policies and practices, maximises the effective use of individuals in both the organisation's and employees' best interests. Air³ Limited recognises the great benefits in having a diverse workforce with different backgrounds, solely employed on ability.
- (c) The application of recruitment, training, and promotion policies to all individuals will be on the basis of job requirements and the individual's ability and merits.
- (d) All employees of the organisation will be made aware of the provisions of this policy.

Recruitment and promotion

- (a) Advertisements for posts will give sufficiently clear and accurate information to enable potential applicants to assess their own suitability for the post. Information about vacant posts will be provided in such a manner that does not restrict its audience in terms of sex, race, marital status, disability, age, part-time or fixed term contract status, sexual orientation or religion.
- (b) Recruitment literature will not imply a preference for one group of applicants unless there is a genuine occupational qualification which limits the post to this particular group, in which case this must be clearly stated.
- (c) All vacancies will be circulated internally.
- (d) All descriptions and specifications for posts will include only requirements that are necessary and justifiable for the effective performance of the job.
- (e) All selection will be thorough, conducted against defined criteria and will deal only with the applicant's suitability for the job. Where it is necessary to ask questions relating to personal circumstances, these will be related purely to job requirements and asked to all candidates.

Employment

- (a) Air³ Limited will not discriminate on the basis of sex, race, marital status, disability, age, part-time or fixed term contract status, sexual orientation or religion in the allocation of duties between employees employed at any level with comparable job descriptions
- (b) Air³ Limited will put in place any reasonable measures and/or adjustments within the workplace for those employees who become disabled during employment or for disabled appointees.
- (c) All employees will be considered solely on their merits for career development and promotion with equal opportunities for all.

Training

Employees will be provided with appropriate training regardless of sex, race, marital status, disability, age, part-time or fixed term contract status, sexual orientation or religion.

Grievances and victimisation

- (a) Air³ Limited emphasises that discrimination is unacceptable conduct which may lead to disciplinary action under the organisation's disciplinary procedure.
- (b) Any complaints of discrimination will be pursued through the organisation's grievance procedure.

Peter Morgan – Managing Director

SECTION 1: ORGANISATION

General Organisation

Arrangements for health, safety, welfare and the environment will be organised by Air³ Limited. The Managing Director has overall responsibility for health, safety and the environment.

The Managing Director has appointed SOCOTEC responsible for monitoring the Company's health, safety and environmental policy and for dealing with related health, safety, welfare and environmental matters.

Constructive suggestions to improve health, safety, welfare and environmental awareness in the Company are welcomed from any employee.

General Responsibilities

Directors and management are responsible for the implementation of the Company's policies on health, safety, welfare and environmental matters, including revision of this policy.

All employees are expected to set a personal example and take reasonable care for the health, safety and welfare of themselves and of others who may be affected by their acts or omissions, as well as protection of the environment from their work activities.

Employees who are responsible for supervision are expected to promote and encourage health, safety and environmental awareness in employees under their control.

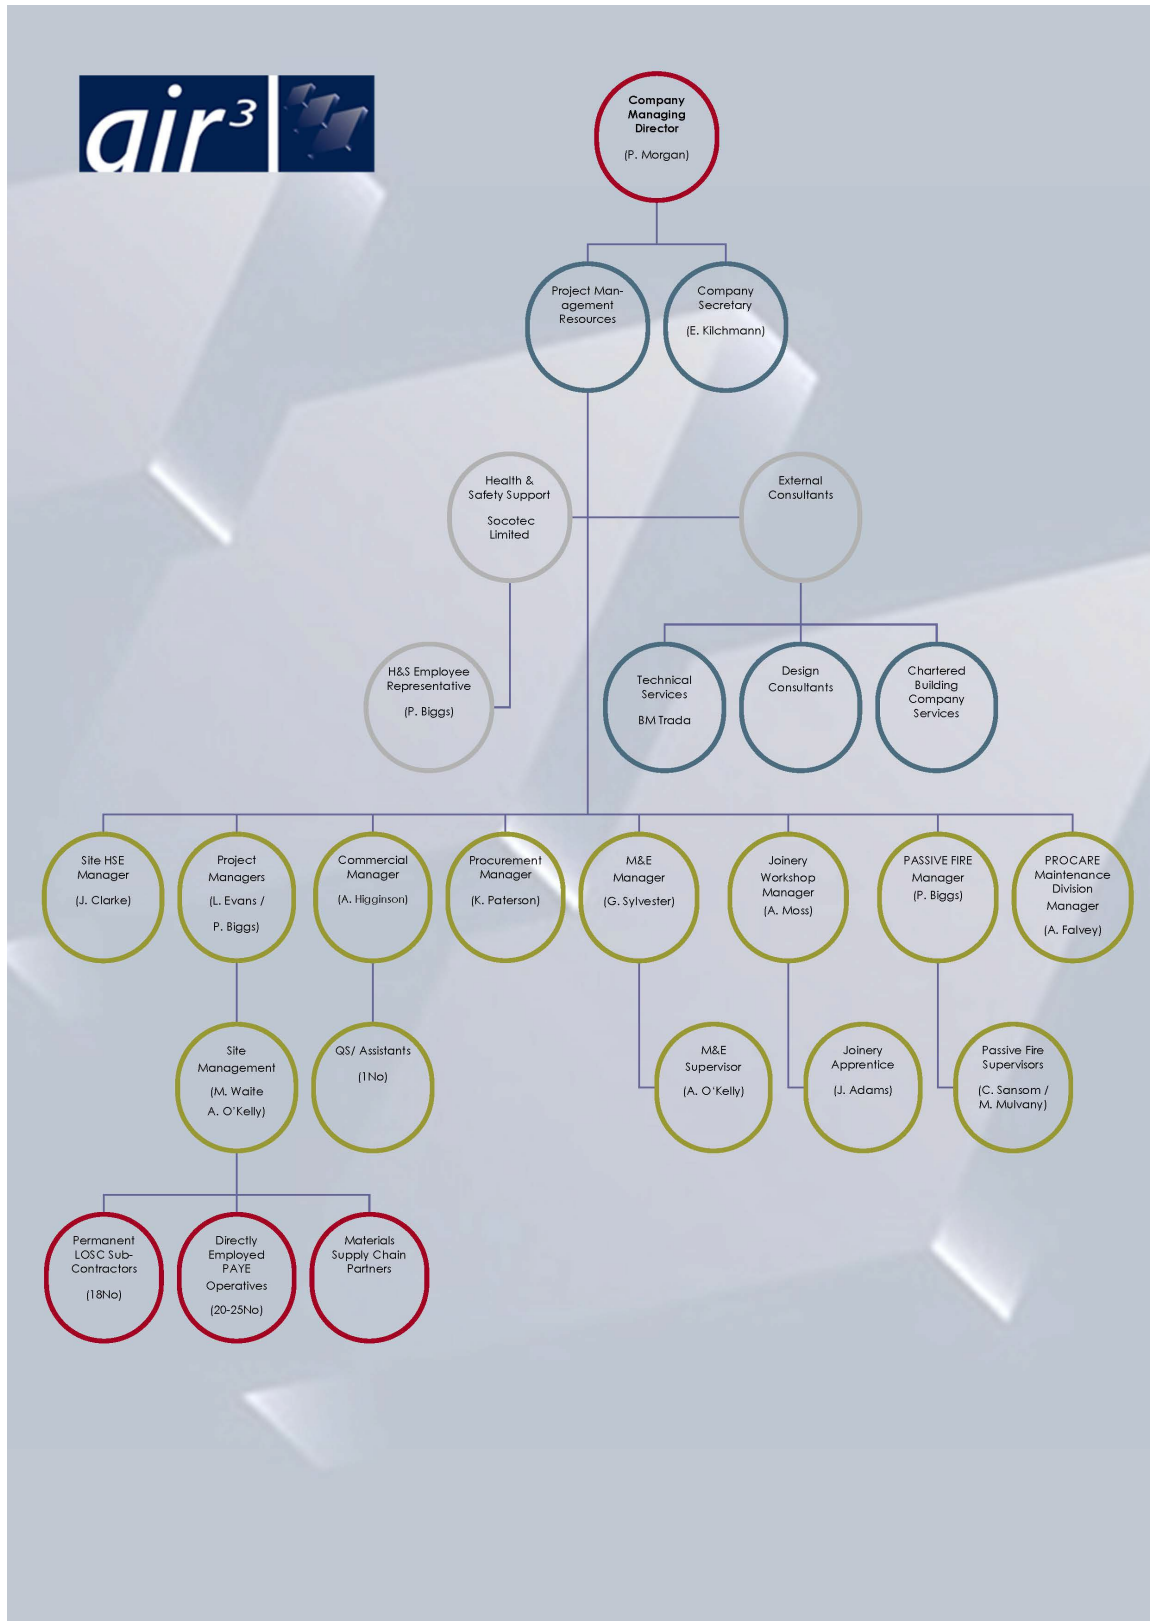

Consultation

Employees will be consulted in accordance with the Health and Safety (Consultation with Employees) Regulations 1996 whenever there are changes in the Company's work procedures and arrangements for health, safety and welfare of the employees and consultation with the Health and Safety Executive (HSE).

Consultation will be either directly with the employees or with a group of employees elected as their 'representative of employee safety'.

Information will be provided initially to allow sufficient time for employee comments and feedback to be considered and any necessary changes made to the proposals.

Air³ Limited Organisational Chart

SECTION 2: RESPONSIBILITIES

Responsibilities of the Managing Director

- To have overall responsibility for health, safety and the environment within the Company.
- To ensure that sufficient resources are made available to meet health, safety and environmental needs within the Company.
- To appoint competent persons to manage health, safety and the environment within the Company.

Responsibilities of the Director Responsible for Health and Safety

- To ensure that the policy supported by any additional instructions, procedures or other organisational arrangements, is implemented on a day to day basis.
- To bring to the attention of the Board of Directors any health and safety matter which may have an adverse effect on the Company, its employees or anyone else who could be affected by the Company's activities.

Responsibilities of Contract Managers

- To read, understand and implement Air³ Limited's health and safety policy, organisation and arrangements, coordinate site works with the minimum risk to the health and safety of all site personnel and other people, and to adhere to all relevant acts and Regulations.
- To ensure that approved codes of practice, safe systems of work, risk assessments and method statements are complied with.
- To ensure that the requirements of health, safety and environmental legislation, e.g. Construction (Design and Management) Regulations (CDM) are complied with.
- To provide information to enable the construction phase plan to be developed and kept up to date during the contract phase.
- To ensure that when required, a site waste management plan (SWMP) has been produced for the project and that the plan is revised and updated throughout the life of the project.
- To ensure that site management comply with the requirements set by the Company's health and safety policy, site safety management plan and site waste management plan, and all documentation records are kept.
- To ensure that all accidents are reported to the enforcing authority in compliance with RIDDOR and investigations are carried out to prevent any re-occurrence.
- To bring to the attention of the Director responsible for safety, issues relating to safety on the site and to make the Director responsible for safety aware of visits made by the enforcing authorities.
- To ensure that recommendations made by the Client or external health and safety consultants are complied with.
- To appoint a competent/trained person to manage the site during absence of the site manager.
- To ensure that all contractors/suppliers have been vetted prior to being employed on each project.

Responsibilities of Managers

- To read and understand the Company's health and safety policy and comply with the prescribed arrangements.
- To be aware of and have knowledge of the various statutory requirements governing the Company's activities and their application.
- To ensure that the requirements of health, safety and environmental legislation, are complied with as they apply to company activities.
- To ensure the health, safety and welfare at work of employees under the control of the Company and of contractors working on the Company's premises/on behalf of the Company by providing and maintaining:
 - Safe places of work and safe access/egress
 - Safe systems of work
 - Adequate levels of supervision, training, instruction, information
 - Relevant risk assessments
 - Safe work equipment
 - Adequate personal protective clothing and safety equipment
 - Adequate welfare facilities
 - Safe methods of handling, transporting stores and equipment
 - Accurate health and safety records
 - Medical surveillance (where the nature of the work being carried out requires it).
- To ensure all employees are aware of and have knowledge of, their health, safety and environmental responsibilities whilst undergoing their tasks, and that they do not place themselves at risk.
- To employ best practice, as defined by the Company and any relevant bodies, at all times with regard to work activities.
- To set a personal example and carry out their own work in a safe manner using personal protective equipment issued by the Company as necessary.
- To ensure that other people, including visitors and members of the public, are not placed at risk as a result of the Company's activities.
- Where the Company is in control of premises, to ensure that others who visit such location(s) are kept free from risk from either the premises or equipment within.

Responsibilities of Foremen/Supervisors

- Set a good example to other employees by following company instructions, guidelines and arrangements when working.
- Ensure workplaces are inspected regularly.
- Monitor waste disposal procedures.
- Ensure method statements and risk assessments are in place, and that control measures that have been identified are being correctly implemented.
- Ensure the correct personal protective equipment is being worn and used correctly.
- Ensure any equipment is used in a safe manner.
- Liaise with the Principal Contractor's site manager and Air³ Limited's operatives on health and safety issues.
- Ensure that work is being carried out without risk to the health and safety of others who may be affected.

Responsibilities of all Employees

- To read and understand the Company's health and safety policy, its environmental policy and comply with the prescribed arrangements and objectives.
- To comply with risk assessments and method statements which apply to their work activities.
- Not to intentionally or recklessly interfere with, or misuse anything provided in the interests of health, safety or welfare.
- To use personal protective equipment issued by the Company where and when required.
- To use work equipment only as instructed and trained. No unauthorised use of equipment is permitted; neither is repair or modification permitted. Damage to equipment should be notified to a manager or supervisor immediately.
- To be aware of and understand the emergency procedures in the event of a fire or an accident.
- To report all accidents to a manager or supervisor, including those where no injury occurred.
- To comply with any reasonable instructions given by Directors or appointed persons on matters of health and safety, for example; the Fire Marshals.

Responsibilities of First Aiders

- To provide first aid to employees and others, as trained.
- To ensure that first aid kits are maintained and that accidents are recorded in the accident book and within the Company's reporting system.
- To assist in the reporting of serious accidents to management notably with RIDDOR reporting and where required, assist in any accident investigation.

Responsibilities of Fire Marshals/Wardens

- To contribute to the management and enforcement of Air³ Limited's fire procedures.
- To ensure that the means of escape are clear and free of obstructions by carrying out regular inspections.
- To ensure that firefighting equipment, signage and fire evacuation procedures are in place/displayed and not misused.
- On hearing the fire alarm:
 - Supervise the evacuation of personnel from their area.
 - Check all rooms, stores and toilets to ensure full evacuation.

Responsibilities of Office and Administration Staff

- To read and understand the Company health and safety policy and comply with the prescribed arrangements.
- To ensure the maintenance of company health and safety records.
- To ensure that for each company driver a full UK driving licence is held and fully covers the vehicle being driven and that the driver has been authorised to use a company vehicle or own vehicle for company use.

Responsibilities of Company Car and Company Van Drivers

- To ensure that a full UK driving licence is held and fully covers the vehicle(s) being driven and that the authorisation to use a company vehicle or own vehicle for company use has been given.
- To not consume alcohol or take medication which could affect driving ability before driving a vehicle on company business.
- To notify the Company of all driving convictions/offences and accidents that occur whilst carrying out company business.
- To ensure that a copy of the relevant business car insurance is obtained and held for use of any vehicle used for company business and that it covers the transfer of passengers and theft of company articles.
- To ensure that the relevant safety checks are made in accordance with the manufacturer's handbook and at the specified frequencies and that any repairs or maintenance are carried out as required.
- For non-company cars, to ensure that all required Road Tax and MOTs (if applicable) are in date and ready for inspection if so requested by the Company.
- Ensure that a mobile phone is only used when it is safe to do so and in accordance with current legislation (i.e. where a hands free kit is fitted). The best recommendation is to wait until the end of a journey to retrieve, receive or send calls.

Responsibilities of Plant/Equipment Operators

- To read and understand the Company health and safety policy and comply with the prescribed arrangements.
- Not to operate any piece of plant, machinery or equipment unless trained and competent to do so.
- To comply with risk assessments and method statements which apply to their work activities.
- Not to intentionally or recklessly interfere with, or misuse anything provided in the interests of health, safety or welfare.
- To use personal protective equipment issued by the Company to protect health and safety.
- To ensure all plant and machinery is subject to a visual inspection before use and that the inspection is recorded.
- To ensure plant and machinery is operated in a safe and controlled manner, with consideration given to operatives and members of the public at all times.

Responsibilities of Contractors / Sub-Contractors

Whilst working in any capacity for Air³ Limited, all contractors are expected to adhere to the Company health and safety policy, to cooperate with the Company on all matters of health and safety at work and to cooperate with the Company's appointed Health and Safety Advisers.

All contractors' employees are to be made aware of Air³ Limited's safe systems of work (SSoW) and location specific procedures.

Where sub-contractors' activities are outside the above, a specific SSoW must be provided to Air³ Limited for approval prior to commencing work.

The SSoW will include a detailed risk assessment of the task to be completed and, where applicable, will include safe methods and COSHH information.

All contractors and sub-contractors' will be required, where applicable, to be able to demonstrate the applicable and suitable level of competence for the activity(s) they are involved in.

Responsibilities of SOCOTEC

- Advise Air³ Limited on the need to prepare, distribute and review a company health and safety policy.
- To provide advice in accordance with the service level agreement on the following:
 - Ensuring a positive health and safety culture is established and maintained
 - Effective communication of health and safety issues
 - Legal requirements affecting health, safety and welfare
 - Adequate standards of personal protective clothing and equipment
 - Working methods, equipment or materials which could reduce risks
 - Potential hazards in the workplace
 - Health and safety factors affecting the selection of plant and equipment
 - Specialist services including substances hazardous to health, noise, asbestos removal and the application of new and current legislation
- Where requested:
 - Carry out inspections of sites and workplaces as notified by Air³ Limited
 - Carry out investigations of serious accidents
 - Assist Air³ Limited in notifying and dealing with the Health and Safety Executive/ Environment Agency.

Health, Safety and Environmental Committee

The Company's Health, Safety and Environmental Committee comprises the following persons:

Name	Role
Peter Morgan	Director Responsible for Safety
SOCOTEC	Appointed Health and Safety Consultants
Peter Biggs	Employee representatives

All employees will be notified whenever there are any changes in personnel on the Committee.

The duties of the Committee will be:

To meet at regular intervals to discuss, assess and revise the on-going implementation of the Company's health, safety and environmental performance, including:

- Accidents, incidents and near-misses
- Employee performance
- Levels of compliance
- Workplace behaviour
- Sub-contractors/suppliers performance.

The Committee will also review and arrange for the training and instruction of all employees in order for them to maintain the high safety standard expected by the Company.

An on-going review will also be made to allocate individual responsibilities for health and safety throughout the Company and to ensure that all individuals are made fully aware of their level of responsibility.

SECTION 3: ARRANGEMENTS

1 Introduction

The general details of Air³ Limited's arrangements for the management of health, safety are provided within this section.

2 Health and Safety Policy

The health and safety policy will be reviewed each year, or more frequently if required, to ensure that it is effective and up to date.

The policy will be amended where required and all employees informed of any amendment.

A copy of the health and safety policy will be available to all employees.

Each workplace will hold a copy of the policy.

The health and safety policy statement will be displayed on a health and safety notice board and a copy held at each work location.

3 Information and Instruction

Air³ Limited recognises the need for effective communication between all parties in the workplace.

The Company will ensure that employees are provided with adequate information and suitable instructions to enable them to carry out their work activities.

Information and instruction will be provided in a form which takes account of any language difficulties or disabilities.

Where the workplace is shared information relevant to the safety of all will be communicated.

4 Internal Communications

All relevant safety information will be provided at all workplaces where employees are located. This will include:

- Health and safety policy
- Environmental policy
- HSE poster
- Employer's Liability Insurance Certificate
- Fire safety instructions
- Names of Fire Wardens and First Aiders
- Other safety instructions relevant to that workplace

5 Non English Speaking Employees

Air³ Limited has identified that those who cannot speak English may fail to understand what is being asked of them through verbal instruction by colleagues, supervisors and managers and may not be able to understand written instructions and operating procedures and processes. This represents a significant risk.

The Company will ensure that all employees are aware of their responsibilities in the workplace and will fully support any employees for whom English is not their first language so that they fully understand their responsibilities, site rules, regulations and reporting procedures. Contractors as employers in their own right will need to demonstrate that they are equally managing this risk correctly. Air³ Limited will work with its contractors to ensure that communication for all in the workplace is effective.

Communication will be achieved through translation and the use of interpreters. Confirmation of understanding will be established.

Air³ Limited will assess the risks associated with the fact that an individual does not speak and/or understand English. The Company will:

- Translate safety notices and training manuals into relevant languages or replace them with written notices with clearly understood symbols;
- Make use of internationally recognised pictorial warning signs which offer a means of communication that should be clear to all regardless of literacy or language;
- Provide safety training sessions in relevant alternative languages to English;
- Provide appropriate English language training ranging from key words only to oral and written fluency in English for longer term workers;
- Make use of bilingual employees to interpret/translate information to their non-English-speaking colleagues.

Air³ Limited will ensure that the interpreter/translator is competent to fulfil that role and will be given sufficient authority to discharge the responsibility placed upon them and ensure that communication is effective.

6 External Communication

Managerial and supervisory staff will ensure that they establish lines of communication with other organisations/persons that may be affected by Air³ Limited's activities. This may be verbally, through the use of signage, in writing or a combination thereof.

Managerial and supervisory staff shall expect likewise that other organisations/persons will communicate health safety, or organisational issues that may impact on Air³ Limited's health and safety.

7 Training and the Maintenance of Competency

Air³ Limited will ensure that its workforce is trained and capable of carrying out their allocated tasks. Many accidents at work happen because an individual is not adequately trained. The likelihood of accidents or injury is reduced when personnel are well trained and are competent.

Managerial and supervisory staff must therefore ensure that all employees under their control have the appropriate training and knowledge required by their tasks and can gain experience relevant to the work being carried out in order to maintain that competence. Newly trained personnel will be appropriately supervised until such time that it is established that a suitable level of competency has been achieved.

Management and supervisory staff will identify and arrange training and instruction of employees.

Records will be kept of all training related to their work activities, including trade related qualifications, along with health safety and environmental issues. Refresher training will be organised (where required) to keep each employee's qualifications up to date and to maintain competence.

Accurate records of training will enable the company to demonstrate effective management of training to enforcing authorities or other interested parties.

8 Safe System of Work

A safe system of work (SSoW) is a formal procedure resulting from the examination of a task. In order that all hazards can be identified and the risks assessed, safe methods of work will be established to ensure that those hazards are eliminated or, the remaining risks are minimised and/or controlled.

To this end Air³ Limited will ensure that a safe system of work is instigated for all work activities that it engages in.

The Company will carry out risk assessments of its work activities. Where a risk assessment identifies a hazard that cannot, so far as is reasonably practicable, be eliminated a method of work will be developed that minimises that risk or enables it to be controlled.

Where a task requires specific control procedures such as a permit to work system, this will be established and implemented.

The contents of the safe system of work document will be formally communicated to everyone involved in the task. Records demonstrating the receipt of this information will be retained by us. This may take the form of an individual assessment or a number of assessments linked to a method statement.

The Company safe systems of work will give due regard to codes of practice, standards and guidance relevant to the work activity.

9 Risk Assessment

Air³ Limited will carry out risk assessments of its work activities. Risk assessments will identify the range of hazards associated with the work activities, together with any necessary remedial action.

Managerial and supervisory staff are required to ensure risk assessments are in place for activities under their control.

These risk assessments will be formulated by competent person(s).

All person(s) involved in a task will have the contents of the risk assessment formally communicated to them. Records demonstrating the receipt of this information will be retained by the Company. A copy of the risk assessment will be available at the workplace.

Where Air³ Limited works with another organisation, for example contractors, we will communicate applicable risk assessment(s) which impact on that other organisation's work. Equally we will ensure that the other organisation communicates its risk assessment(s) where these have an impact on the health and safety of our workforce.

All risk assessments will be monitored and reviewed at regular intervals based upon the level of risk or when working practices or equipment change, to confirm that risks are adequately controlled and comply with current legislation.

10 Method Statements/Plans of work

A method statement will be produced by Air³ Limited to describe how to control the risks identified for work activities in order to achieve a safe system of work.

A copy of the method statement and its associated risk assessments will be available at the workplace.

Everyone involved in the task will have the contents of the method statement formally communicated to them by manager or supervisor. Records demonstrating the receipt of this information will be retained by the Company.

The Principal Contractor will be requested to ensure that all requirements are met and that all planning procedures/control measures are implemented, with particular reference to hazardous features that the Principal Contractor has control over.

11 Safe Place of Work

Air³ Limited is required to provide its employees, as far as is reasonably practicable, with a safe place of work along with safe access to and from that place of work. This will largely be achieved by the implementation of a safe system of work within that workplace.

Furthermore we will make adequate arrangements to ensure that all workplaces are maintained in a clean, orderly and safe condition.

Regular inspections/monitoring of workplaces will be conducted by a competent person. Records will be kept and any findings reported, and where appropriate actioned.

12 Home Working

Should company employees work at home at any time, the general arrangements for managing their workplace will still apply.

To minimise risks, a risk assessment of the workplace will be carried out to identify potential hazards, in the same way as in a traditional work environment.

Records of assessments will be retained and reviewed to ensure the working environment remains acceptable.

All work equipment that is issued for home use will be subject to an assessment of suitability and will be subject to regular inspection on request. All sections of the health and safety policy and procedures will remain applicable, particularly accident reporting.

13 Work in Confined Spaces

A confined space is defined as any place, in which, by virtue of its enclosed nature and the activities being undertaken or the conditions within, there arises a reasonably foreseeable specified risk.

Air³ Limited shall give due consideration to establish if its activities are taking place in what could be a confined space and shall take action accordingly.

Where the workplace is viewed as a confined space it shall be considered whether the work can be carried out without accessing the confined space. Where it cannot, the work will be subject to risk assessment. Permits to work will be used.

Only competent persons may be involved in confined space work.

14 Work In other Employer's Premises

All activities that Air³ Limited engages in within other employer's premises will be subject to risk assessment.

Liaison with the controller of the premises will be achieved in order that suitable cooperation and coordination can be established to ensure the health and safety for all involved.

15 Work In Schools and Other Educational Establishments

The level of DBS check we will need is mainly dependent on the opportunity to be in contact with children.

There are 3 levels of checks:

Basic DBS Check – The lowest level, which shows unspent convictions. These checks can be requested by an individual or employer.

Standard DBS Check – This tier shows both spent and unspent convictions. Unlike the Basic, these checks can only be requested by employers.

Enhanced DBS Check – Shows spent and unspent convictions, as well as any information believed to be relevant by the Local Police Force. Like Standard checks, these can only be requested by an employer.

Contractors working in schools who will be engaging in regulated activity require an enhanced DBS check with children's barred list check.

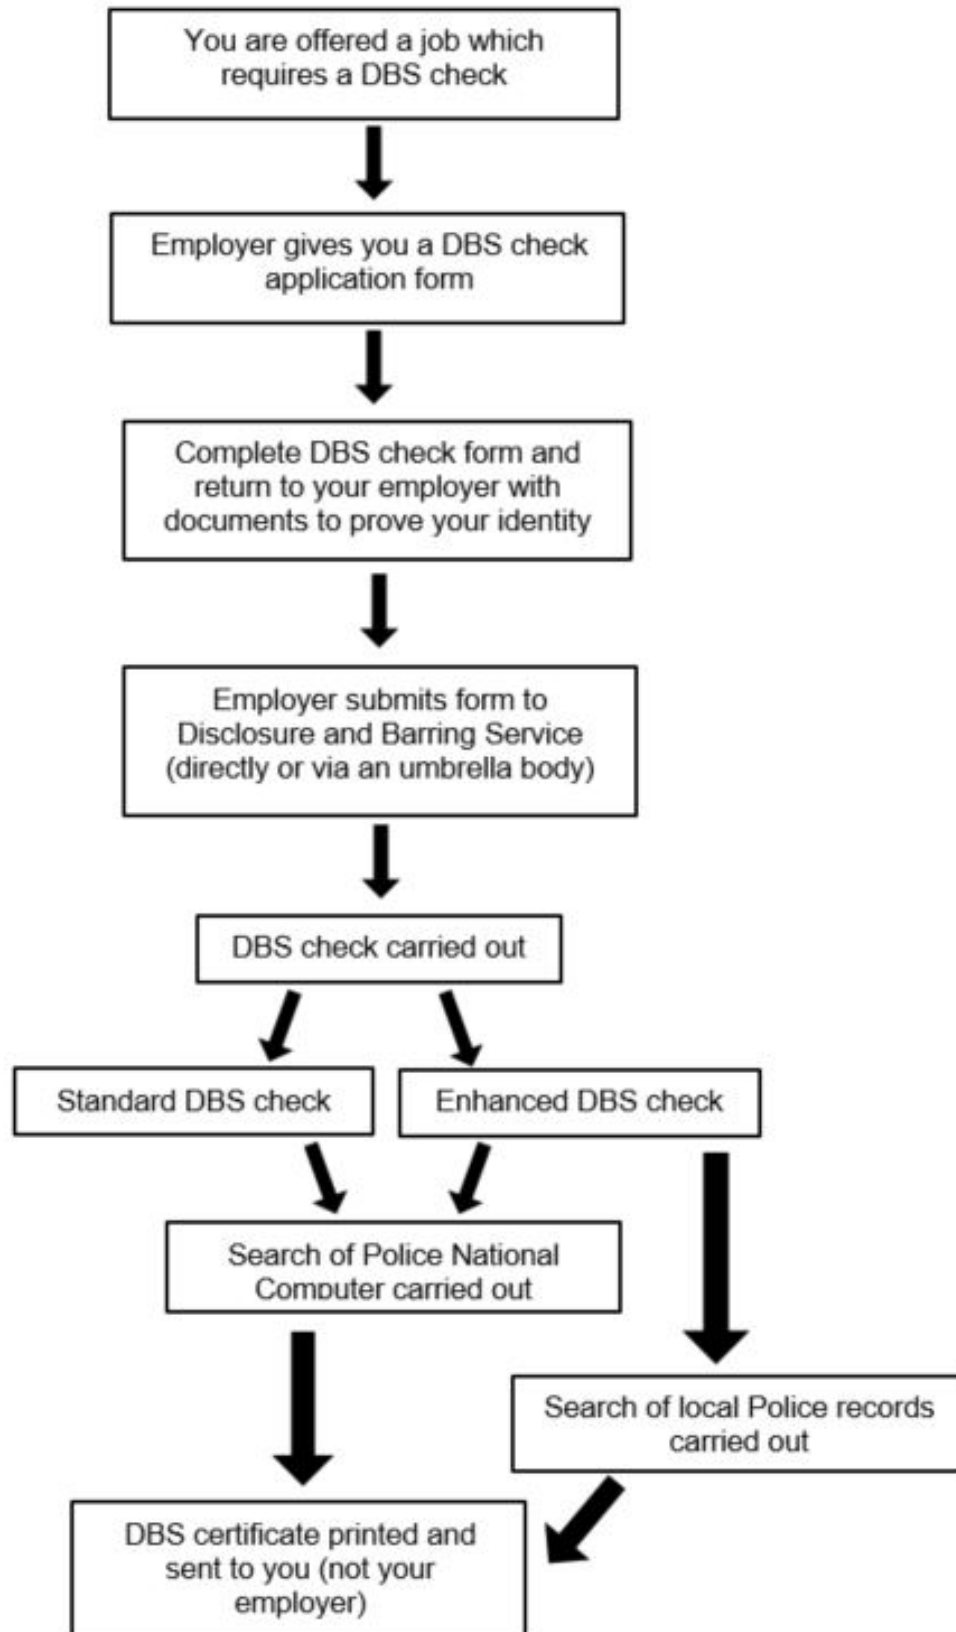

Contractors working in schools who will not be engaging in regulated activity, but are still working in a specified place with the opportunity for contact with children, for more than 3 days in a 30-day period – also require an enhanced DBS check with a children's barred list check.

Contractors working in schools who will not be engaging in regulated activity, but are still working in a specified place with the opportunity for contact with children, for less than 3 days in a 30-day period – require an enhanced DBS check, but do not qualify for a barred list check.

Contractors working in a school, but where there is no opportunity for contact with children do not require a DBS check by law, and as such are only eligible for a basic check. For example, this could be because they are working during school holidays, during the night, or in an area of the school off-access to children. For this last point to be applicable, there must be no opportunity whatsoever for contact with children.

Usually, the school we are working at will decide what type of check we will need, and offer to cover the costs of an independent contractor. If you are with an agency, the agency may offer to provide your DBS check.

If you are an independent contractor, you will be unable to request an enhanced DBS check, as only employers can request these. In this situation, the school will have to arrange your DBS check for you. The school will usually cover the cost of the check, although they are not obligated to do so.

16 Winter Conditions

Whilst we make every effort to ensure that temperatures within internal work areas are reasonable, it is foreseeable that heating systems may fail due to breakdown or power disruption. Should this occur, staff should utilise the portable heaters where possible, in accordance with our fire risk assessment and put on additional clothing as a temporary measure whilst a solution is sought.

Where the temperature in the work areas falls below 16 degrees Celsius for a prolonged period, managers will authorise staff to go home on full pay. If work in some areas involves physical effort the minimum temperature which applies is 13 degrees Celsius.

For outdoor workers guidance shall initially be taken from the Principal Contractor. If the Principal Contractor deems that the site is to remain open but the site manager or Managing Director assess that it would be unreasonable for personnel to remain on site, they will be instructed to go home on full pay for that day.

Should the site manager or Managing Director assess that it would be unreasonable to ask employees to attend site, they will be contacted and asked not to attend the work place that day. Personnel will not be paid in this situation. Employees who drive for work purposes have been issued with, and are expected to follow, the relevant sections of the health and safety policy.

In the event of snowfall within the commuting routes of employees, managers will monitor weather conditions and release staff early if necessary to avoid them being trapped at work. Managers will also contact staff if the workplace is to be closed and/or they not expected to come to work e.g. during a period of prolonged freezing conditions.

Unless directed by management not to attend, employees are expected to make reasonable efforts to come to work without taking personal risks. Travel warnings should be heeded.

Line managers are responsible for ensuring that additional communications and other precautions are taken as necessary to safeguard those who are lone working.

If due to low staff numbers, our first aiders are not available the most senior manager present will take the role of appointed person for the purpose of managing any first aid incident and obtaining medical treatment.

Procedures will be implemented in accordance with our slips, trips and falls policy to control the additional slipping hazards presented by the weather. In particular, all external walkways and steps on our premises will be regularly cleared of snow and gritted to reduce ice. We will follow the government's 'snow code' in our approach to clearing snow and ice.

We will also pay particular attention to building entrance areas to minimise the risks from wet floors. Employees will be encouraged to wear footwear with a good tread when walking outside e.g. between the car park and the buildings.

17 Adverse Weather

During periods of adverse weather Air³ Limited aims to continue to deliver services and keep premises open where possible, to safely maintain and support clients and employees.

Employees have a responsibility to report for work. In the event of adverse weather, all employees are expected to make every effort to report for work, including attempting to travel by alternative means than those used in normal weather conditions.

Adverse weather can impact on working conditions, especially where employees are required to travel at work. In such circumstances, appropriate measures require to be implemented to manage any increased risk to employees.

It is also recognised that there may be occasions where employees are prevented from attending their workplace or prevented from returning home as a consequence of the weather conditions.

Where weather deteriorates over the course of the working day, managers have discretion to send employees home where there is clear evidence that individuals will encounter significant difficulty in reaching their home at reasonable times.

The discretion exercised by managers in this context means that some employees may be allowed home earlier than those who are unlikely to encounter difficulties. All such situations should be managed with care taking into account the circumstances of the individuals concerned.

Adverse weather is defined as weather conditions which:

- have unusual consequences which affect working conditions
- prevent staff getting to work
- cause significant problems for staff getting to and from work

This can include snow, ice, fog, floods, high winds, hot weather and high temperatures both internal and external environments, which render travel extremely hazardous.

When working outdoors the effects of the weather in the UK environment can potentially have a serious impact on an employee's health if the risks have not been considered or properly managed. This impact may be immediate or it may occur over a long time period.

In these circumstances some of the most effective ways of managing these environments are to introduce some simple controls for example in hot conditions:

- reschedule work to cooler times of the day
- provide more frequent rest breaks and introduce shading to rest areas
- provide free access to cool drinking water
- introduce shading in areas where individuals are working
- encourage the removal of personal protective equipment when resting to help encourage heat loss
- educate workers about recognising the early symptoms of heat stress

In cold conditions the following controls should be considered:

- ensure the personal protective equipment issued is appropriate
- provide mobile facilities for warming up, and encourage the drinking of warm fluids such as soup or hot drinks
- introduce more frequent rest breaks
- consider delaying the work – can it be undertaken at warmer times of the year without compromising on safety?
- educate workers about recognising the early symptoms of cold stress – this can be done by delivery of Tool Box Talks or Safety Briefings.

Managers should ensure that any controls implemented are in line with any set business continuity planning or disaster management arrangements. They should ensure that they are using reliable sources for weather information such as:

Adverse weather warnings (UK):

- Met Office National Severe Weather Warning Service (NSWWS)

Flood warning service:

- Environment Agency (covering England)
- Northern Ireland Department for Infrastructure
- Scottish Environment Protection Agency
- Natural Resources Wales

Managers are expected to monitor and respond to different alert levels as follows:

Yellow warning

Yellow warnings can be issued for a range of weather situations. Many are issued when it is likely that the weather will cause some low level impacts, including some disruption to travel in a few places. Managers are required to monitor the latest forecast and be aware that the weather may change leading to disruption of plans in the following hours/days.

Amber warning

There is an increased likelihood of impacts from severe weather, with the possibility of travel delays, road and rail closures, power cuts and the potential risk to life and property. Each service must review working arrangements in light of deteriorating weather conditions. Alternative arrangements may require to be put in place for site / home visits to manage any increased risk to employees.

Red warning

Dangerous weather is expected. It is very likely that there will be a risk to life, with substantial disruption to travel, energy supplies and possibly widespread damage to property and infrastructure.

18 Working in Hospitals

On occasion, Air³ Limited may work within hospitals.

As with all sites that the Company works on, isolation and emergency procedures will be followed.

In addition to this, risk assessments will be compiled for work in situations encountered such as:

- Needle stick injuries – (SHARPS Risk Assessment and procedure);
- Violent/psychiatric patients – (assaults etc);
- Abduction – (Children's wards etc);
- Health monitoring – (MRSA etc).

On all occasions, personnel representing the Company will work closely with the hospital management teams and be fully briefed on the procedures for each establishment.

19 Monitoring at the Workplace

Managerial and supervisory staff must ensure that all workplaces and activities under their control meet the requirements set out in this policy. Where it is found that the policy cannot be followed, the issue must be reported to senior management for review of the policy and/or the procedure. Some activities may require specific assessment.

SOCOTEC will when requested, visit and carry out regular inspections of all workplaces and provide guidance and advice on all aspects of health, safety, welfare and the environment to all nominated employees. Reports will be presented to the site managerial and supervisory staff on completion of the inspection and a copy of the inspection report will be sent to the contracts manager and Managing Director.

All specified injuries and dangerous occurrences will be investigated. A report will be produced and, where feasible, recommendations for preventative and/or corrective action will be made.

All accidents and near misses must be reported to managerial and supervisory staff at the workplace, notably where incidents and injuries are to be notified to the enforcing authorities subject to the requirement of legislation. Such incidents will be investigated in accordance to the severity of the incident and this may require the assistance of SOCOTEC upon request.

Injuries of any description must be recorded in the accident book. Senior management will take steps to analyse such information in order to take such steps as are necessary to implement remedial action and so prevent reoccurrence where it is able.

Meetings to discuss health, safety, welfare and environmental issues will be held at regular intervals between management and SOCOTEC upon request.

20 Work at Height

The Work at Height Regulations require employers to:

- Avoid employees working at height where it is possible;
- Make effective use of safe places of work already provided;
- Use work equipment or other measures to prevent falls where working at height cannot be avoided; and
- Where they cannot eliminate the risk of a fall liable to cause personal injury, use equipment or other measures to minimise the distance and consequences of a fall should one occur.

The Company will carry out a risk assessment to identify the risks of work at height and develop processes to eliminate or control the risks. Additionally we will ensure that all work at height is adequately planned, organised and supervised and carried out in a safe manner.

Air³ Limited will ensure that everyone involved in working at height is competent (or being trained and supervised by a competent person). We will provide any information, instruction and training that an employee may require to carry out his or her work in a safe manner when working at height.

Air³ Limited will appoint a competent person(s) to inspect and maintain work at height equipment (including places of work) at the statutory intervals determined by the environment and frequency of use.

All personal protective equipment provided to maintain safety when working at height (i.e. harnesses and lanyards); will be inspected at the required frequency and any defects noted during those inspections. These will be reported by operatives prior to or during use and will be attended to immediately.

Employees must inspect the equipment provided immediately before they use it and ensure any defective equipment is exchanged or repaired before use.

If work is to be undertaken at height then prevention of falls will be the first priority. Collective prevention measures will be put in place so that personal protection is only a secondary measure.

When selecting work equipment, Air³ Limited will take account of the working conditions, the distance to be negotiated, and the distance and consequences of a fall.

Additionally, we will ensure that arrangements are in place in the event of an emergency or a rescue needing to be facilitated.

Air³ Limited has determined that the following hierarchy of measures will be taken to carry out work at height:

- Avoid working at height where possible;
- Use:
 - scaffolding or mobile towers erected by competent persons and complying with Schedule 2 of the Work at Height Regulations 2005, or
 - Mobile Elevating Work Platform, or

- Podium or deck type platform, or
- Step ladders and ladders (subject to criteria set out in the section on ladders and stepladders).

21 Scaffolding

All reasonable steps will be taken by Air³ Limited to provide a safe place of work for employees required to use scaffolding.

Scaffold structures will be erected by a competent contractor.

The nature of the structure will be determined by the requirement(s) of the work to be carried out, the environmental conditions and the location of the structure. This may mean that the scaffold may follow a standard design (TG20/21) compliance sheet or require a bespoke scaffold design drawing.

Access to the scaffold will be determined by site conditions. However; the aim should be to provide a staircase where reasonably practicable, or ladders with adequately protected landing points.

The Company will ensure that the necessary preventative and protective measures are put in place to prevent falls of persons or materials from the workplace and will liaise with any other persons involved in the work activity.

The Company will appoint a competent person to be responsible for supervising the erection, altering and dismantling of scaffolding and for inspecting all equipment, before it is used, after any event likely to affect its stability and at intervals of seven days or less, as required.

Inspections will be recorded. Records will be retained at the place of work until completion and thereafter for three months at head office.

22 Mobile Towers

All reasonable steps will be taken by Air³ Limited to provide a safe place of work for employees required to use mobile tower scaffolds.

Mobile towers will be erected and used only by competent persons with the relevant proof of training in accordance with the mobile towers instruction manual.

These persons will be required to inspect the individual components and the tower as a whole prior to use. It will also be inspected after every occasion that the tower is erected. If the tower remains static for more than seven days then it shall be subject to inspection.

All inspections will be recorded. Records will be retained at the place of work until completion and thereafter for three months at head office.

The Company will ensure that the necessary preventative and protective measures are put in place to prevent falls of persons or materials from the workplace or of the tower itself, and will liaise with any other persons involved in the work activity. The safety of the personnel erecting the tower must be maintained throughout the process and likewise during dismantling.

In selecting mobile towers for use, we will ensure that they are appropriate for the work and that the methods of erection and dismantling provide the safest method possible.

23 Podium Steps and Low Level Access Equipment

All reasonable steps will be taken by Air³ Limited to provide a safe place of work for employees required to use podium steps and low level access equipment.

Podium steps and low level access equipment will be erected and used only by competent persons with the relevant proof of training in accordance with the equipment's instruction manual. These persons will be required to inspect the individual components and the equipment as a whole prior to use.

Inspections will be recorded. Records will be retained at the place of work until completion and thereafter for three months at head office.

The Company will ensure that the necessary preventative and protective measures are put in place to prevent falls of persons or materials from the workplace or from the equipment itself. The Company will liaise with any other persons involved in the work activity.

In selecting podium steps and low level access equipment for use, we will ensure that they are appropriate for the work and that the methods of erection and dismantling provide the safest method possible.

24 Ladders and Step Ladders

Ladders will be used only where the use of more suitable work equipment is not justified. This could be due to the low risk and short duration of use, or because of existing features within the workplace which cannot be altered which make ladders the only possible suitable equipment.

No work will be conducted from ladders unless a risk assessment shows that this is the only reasonably practicable and final option. Every attempt will be made by Air³ Limited to eliminate the use of ladders and step ladders as an option for working at height.

If ladders are deemed to be the only option, they will be used only if a risk assessment shows:

- That the operative can maintain three points of contact;
- That the task is of short duration (under 30 minutes);
- That the task is low risk;
- Ladders are classified as 'Professional' under BS EN131;
- Ladders can be set at an angle not exceeding 75 degrees (1 out to 4 ratio);
- Ladders are clearly identifiable and subject to regular inspections.

Additional control measures will be introduced (if practicable) to reduce the risks to a minimum. This will be in the form of ladder stays, stand offs or other proprietary ladders or ladder securing devices.

Persons using ladders will have attended training in the use of ladders and any associated accessories and be familiar with the hazards associated with the use of this equipment.

Step ladders will be used only when the risk assessment determines that their use has a low risk and is of a short duration (less than 30 minutes) and, where other equipment cannot fit due to space restrictions. Priority will be given to selecting work equipment with a working platform and some type of edge protection or rail whilst the operative is on the steps. Podium steps or similar design equipment will be considered in the first instance.

Step ladders will be of sufficient height to enable the work to be carried out from no higher than the third tread from the top. Step ladders will be used only on a firm and level base to prevent them toppling.

All ladders and step ladders will be inspected prior to each use and on a regular basis which shall be recorded.

The use of ladders and or step ladders shall be subject to a permit to work system if required by the Principal Contractor.

25 Plant/Machinery/Equipment

All reasonably practicable steps will be taken to secure the health and safety of employees who use, operate or maintain plant, machinery and equipment or may be affected by it use.

Air³ Limited will carry out assessment(s) of risks for use and maintenance of all plant, machinery and equipment, and will ensure that all control measures identified in the risk assessment(s) are implemented to minimise risk.

All plant, machinery and equipment provided for use in the workplace will be subject to a system of inspection, service and maintenance as recommended by the manufacturer or a competent engineer. Only competent and appointed personnel may carry out maintenance.

Records of the inspections, service and maintenance, including statutory inspections, will be maintained in accordance with current legislation.

26 Lifting Equipment

Lifting equipment covers a wide range of equipment. All lifting equipment must be suitable for the task.

Air³ Limited will obtain adequate information from the installer or supplier of lifting equipment on the safe and proper use of the equipment.

Any lifting appliance or lifting equipment provided or delivered to a workplace must have been tested, thoroughly examined and inspected in accordance with the relevant standards.

Copies of inspection certificates, register entries etc. must be available at the workplace.

The equipment will be subject to inspection on a daily basis by the operator and on a regular basis relevant to its use and environment. Inspections shall be recorded.

Employees trained in the use of lifting equipment must not exceed the safe working load of that lifting equipment or use it in a way or for a purpose for which it is not intended.

27 Crane Lifts

All crane lifts are to be planned and documented. Planning is to be carried out by a suitably trained and competent person.

No alterations to lifting plans are to be carried out other than by a suitably trained and competent person.

Cranes are to be operated by suitably trained and competent persons.

Crane lifts are to be supervised by a suitably trained and competent person.

In accordance with the requirements of the lifting plan and good practice, trained banksman and slinger/signallers will be available.

Means of communication between all parties will be agreed prior to commencement of any lift.

28 Mobile Elevating Work Platforms

Mobile Elevating Work Platforms (MEWPs) must be operated only by competent employees who hold relevant proof of training and have undergone familiarisation training by the plant hirer.

When cherry picker type MEWPs are used, employees will be attached to the proprietary fixing point by a harness and fixed length restraint lanyard.

To prevent being thrown out, an employee operating a scissor lift type MEWP should fix harnesses to the attachment point when operating the machine over rough ground and while the platform ascends and descends. There is no requirement to be harnessed to the scissor lift whilst working within the confines of the platform when it is in a static position.

29 Mobile Plant

Only trained and appointed personnel will be permitted to operate any mobile plant under Air³ Limited control.

Such personnel will be familiarised with any mobile plant that is new to them (i.e. hired item from a different manufacturer that the personnel are used to).

Personnel will have access to manufacturers/suppliers instruction on operation, servicing and maintenance.

Personnel will not travel on mobile plant unless there is a safe place for them to do so.

Any safety features fitted to the mobile plant i.e. seat belts roll bars etc. will be fully used.

Only plant with the correct features may operate on the public highway.

30 Driving When Working for Air³ Limited

Air³ Limited recognises the risks to drivers when at work through the statistics released annually by the HSE and information in the media. The Company has a responsibility to manage the health, safety and welfare of their employees whilst driving either company or self-owned vehicles used for work.

The Company's policy is that all drivers must be in control of their vehicle at all times.

A hands free kit will be fitted to company vehicles to enable drivers to use the phone in accordance with current legislation.

It is a criminal offence for a driver to hold or use a mobile phone or hand-held device even when the vehicle is stopped at a red light or in traffic.

This includes any device which is capable of interactive communication even if that functionality is not enabled at the time. This would include a device being in flight mode.

The meaning of 'using' a phone is expanded to cover the following:

- illuminating the screen
- checking the time
- checking notifications
- unlocking the device
- making, receiving, or rejecting a telephone or internet-based call
- sending, receiving or uploading oral or written content
- sending, receiving or uploading a photo or video
- utilising camera, video, or sound recording
- drafting any text
- accessing any stored data such as documents, books, audio files, photos, videos, films, playlists, notes or messages
- accessing an app
- accessing the internet.

All drivers must be fit to drive. Any employee who is under the influence of drugs, alcohol or any substance likely to cause a danger to themselves or others, is forbidden to drive. Should any member of staff feel unfit to drive for any reason, a supervisor or manager should be immediately informed.

Only those employees who hold a current valid driving licence for the vehicle type they plan to drive are permitted to do so.

Authority will be given to all drivers and a copy of their full UK driving licence will be held on file.

Authorised drivers will be required to notify the Company of driving convictions and offences. Business use insurance must be in place for all drivers of vehicles.

For all company vehicles the required Road Tax and MOT (if applicable) will be held and a register kept and held on file.

Company vehicles will be subject to maintenance and servicing in accordance with manufacturer's instructions. Additionally, regular checks will be carried out on the roadworthiness of all company vehicles (e.g. tyre pressure and condition, including spare; correct functioning of lights; oil, coolant, brake fluid and windscreen washer fluid levels; damage to windscreen).

Employees will be instructed on how to carry out these checks themselves and reminded to undertake them.

Employees will be made aware that they must not drive without the correct glasses or contact lenses (where required), when fatigued, when under the influence of alcohol or drugs or if suffering from any illness or taking any medication that may affect their ability to drive safely.

31 Display Screen Equipment

The use of Display Screen Equipment (DSE) has been linked to cases of musculoskeletal disorders (see separate section within this policy) and eye problems.

In accordance with current legislation Air³ Limited will identify all Users – those employees who use DSE for a significant part of their working day (usually in excess of 1 hour).

A suitable assessment of the risk will be carried out for all users. Any risks identified will be reduced as far as is reasonably practicable.

All users will receive regular, adequate training and information in the correct set-up and use of DSE.

Eye tests will be provided upon request and the Company will make a contribution to the basic price of spectacles provided specifically for the use of DSE.

Any user who works at home or away from the Company's premises will receive adequate information in the correct set-up and use of DSE. This information should enable the person to complete their own DSE risk assessment, which will be returned to their manager once complete.

Any risks identified will be reduced to low as is reasonably practicable.

32 Occupational Health

Air³ Limited recognises that workers may suffer from ill health caused or made worse by work. This may be due to for example:

- Musculoskeletal disorders (MSDs): from work-related upper limb disorders (WRULDs) and back injuries;
- Work-related stress;
- Occupational dermatitis;
- And many others.

We will carry out assessment(s) of risks related to potential ill health through work activities and will ensure that all control measures identified in the risk assessment(s) are implemented to minimise risk.

Employees are encouraged to report any suspected work related ill health through managers so that action can be taken to manage the situation.

33 Noise

Current legislation under the Control of Noise at Work requires employers to reduce and control the exposure to noise to their employees. This is achieved by assessing the risk and taking account of exposure levels set within the Regulations.

The exposure levels apply to either a daily or weekly exposure based on 8 hours- dB (A) or the maximum noise (peak sound pressure) in a working day- dB (C):

Lower Exposure Action Value

- Daily or Weekly Personal Noise exposure – 80 dB (A) Peak sound – 135 dB (C). Assessment is required to establish potential risk and hearing protection is made available.

Upper Exposure Action Value

- Daily or Weekly Personal Noise exposure – 85 dB (A) Peak sound- 137 dB (C) Noise is reduced and where this is not successfully controlled, ideally through mechanical means, then through mandatory use of hearing protection.

Additionally an Exposure Limit Value as been set:

- Daily or Weekly Personal Noise exposure of 87 dB (A) Peak sound– 140 dB (C). This must not be exceeded even taking account of the protection afforded by hearing protection.

We will carry out suitable and sufficient risk assessment for all activities where it is believed that there is a risk of employees being exposed above the lower action value 80 decibels.

The Company will eliminate or control noise at source where it is practicable to do so. Where it is not, we will provide employees with suitable and sufficient hearing protection selected according to the noise risk to which the employees are exposed.

Air³ Limited will:

- Ensure that all employees, contractors and visitors receive such information as is necessary to warn them of the risk. Furthermore that they will obey any instructions and warning notices with regard to the wearing of hearing protection in areas where a risk exists;
- Ensure plant and equipment is selected and maintained to minimise noise levels;
- Ensure suitable ear protection is supplied for the conditions of exposure;
- Ensure adequate means of communication in noisy environments, especially if relevant alarm sounds may need to be heard;
- Workplace management and supervisors will ensure compliance with any noise levels.

Employees have a duty to comply with and use the measures that Air³ Limited provides under the Regulations including:

- To use any controls as determined by the risk assessment;
- To wear any hearing protection provided when exposed at or above the upper exposure limits or where mandatory areas have been designated;
- Not misuse, interfere with the hearing protection and report any defects to the employer.

34 The Control of Vibration

Current legislation under the Control of Vibration at Work requires employers to make a suitable and sufficient assessment of the risks posed of either hand/arm and/or whole body vibration.

Employers must introduce control measures to, in the first instance, eliminate the vibration at source or, where this is not reasonably practicable, reduce the vibration to as low a level as reasonably practicable.

The exposure limits and action values are:

- Daily Exposure Limit Value – 5 m/s² in an 8 hour period
- Daily Exposure Action Value – 2.5 m/s² in an 8 hour period

Therefore Air³ Limited will ensure that a regime is implemented for:

- Establishing the risks associated with tools that vibrate;
- Knowing which items of equipment pose the highest risk to employees;
- Ensuring that a purchasing/hiring policy is established to ensure that the equipment is selected correctly;
- Setting policy based on recognised exposure limits for the use of this equipment;
- Providing information, instruction and training on vibration risks to employees;
- Recording exposure levels and durations for employees where necessary;
- Providing health surveillance where required.

The basis of the risk assessment is to avoid the risk wherever possible. However, if the job cannot be done without exposure to vibration equipment the following steps will be taken:

- **Select** - select equipment that produces the least possible vibration or removes the operative from the source of the vibration by using remote control equipment;
- **Provision** - consider other equipment which can be used in conjunction with the vibrating equipment which reduces the risk of injuries caused by vibration, for instance foul weather protection for cold and damp;
- **Maintain** - good maintenance can reduce vibration levels considerably; operatives should be instructed in basic maintenance such as the replacement of blunt drills or chisels;
- **Limitation** - ensure that limits/durations are set on tasks and appropriate rest periods are taken;

- **Train** - make operatives aware of the risks and the precautions, such as gripping tools properly;
- **Inform** - provide up to date information on the vibration risks;
- **Review** - review the use of vibrating equipment as technological advances are made available.

35 Hazardous Substances

Prior to any work activity commencing, information must be obtained on any material, substance or process to be used or likely to be encountered which could be a hazard to the health of personnel.

Air³ Limited shall carry out risk assessment(s) related to the use of products or the creation of by-products, to identify whether those substances are hazardous to health. If necessary, a workplace/job specific Control of Substances Hazardous to Health (COSHH) assessment will be produced.

Appropriate control measures must be identified and implemented to ensure the health and safety of personnel affected by the use of substances hazardous to health and the protection of the environment.

Such control measures may seek to eliminate/substitute the substance, to provide collective protection and or personal protection.

36 Control of Respirable Crystalline Silica and Dust

The company recognises the hazards and risks associated with Respirable Crystalline Silica (RCS) and dust.

As part of its strategy to control exposure to these hazards, Air³ Limited shall carry out risk assessment(s) related to the production and creation of RCS and dust, to identify appropriate control measures that must be implemented to ensure the health and safety of personnel affected.

These controls must follow the hierarchy of control as stated in the COSHH Regulations considering:

- Wet work where possible;
- Segregation of work activities;
- Provide and maintain exhaust ventilation or on tool extraction where possible;
- Provide and maintain suitable respiratory protection; and
- Vacuum not sweep

Guidance and exposure limits for these substances must be used when assessing the hazards and consequences when potential exposure is identified. EH40, L5 ACOP and HSE and industry guidance should be used as points of reference.

Such control measures must seek to control the hazards at source with local exhaust ventilation (LEV) or on tool extraction using suitable filtration where required. Suitable personal respiratory protective equipment (RPE) must be provided where identified.

RPE must be suitable and sufficient with all personnel using RPE having valid face fit testing certificates.

Air³ Limited will ensure that all controls identified are implemented and managed on site.

If the need for health surveillance is required this will be undertaken where necessary following the company's arrangements.

Suitable training and instruction on the hazards and risks associated with RCS and dust will be undertaken.

37 Musculoskeletal Disorders and Manual Handling

Musculoskeletal disorders (MSD) cover any injury, damage or disorder of the joints or other tissues in the upper/lower limbs or the back. Air³ Limited will take the steps necessary to prevent and manage MSDs, assessing the risks of manual handling and repetitive tasks.

The incorrect handling of loads causes large numbers of injuries and can result in pain, time off work and sometimes permanent disablement.

Manual handling operations are defined as "any transporting or supporting of a load, including the lifting, putting down, pushing, pulling, carrying or moving thereof, by hand or by bodily force".

Current legislation requires, where reasonably practicable, that manual handling is eliminated. Where it cannot be eliminated, then a risk assessment must be carried out where there is a risk of injury due to the manual handling operation.

To this end, the Company shall seek to effectively manage the handling activities that its personnel may be engaged in as part of their work (including taking account of repetitive tasks). This will be achieved by the following four steps:

- **Avoid** the need for manual handling, so far as is reasonably practicable;
- **Assess** the risk of injury from any manual handling that cannot be avoided;
- **Reduce** the risk of injury from manual handling, so far as is reasonably practicable;
- **Inform** the employer if hazardous handling activities are identified.

Where manual handling tasks are necessary, we will conduct a risk assessment and implement any required control measures. These may include:

- Provide mechanical aids such as trolleys, pallet truck etc;
- Provide sufficient persons to enable the lift to be carried out in a safe manner;
- Provide suitable lifting attachments such as handles or handholds;
- Ensure items are secure to prevent load shifting;
- Reduce the size of load to be lifted;
- Provide adequate PPE;
- Provide employees with manual handling training;
- Provide manual handling information through posters etc.;

- Ensure employees take care to ensure that their activities do not put others at risk.

38 Stress

Stress in the workplace is a reality of working in current times. An employee who is severely stressed may significantly increase the likelihood of having or contributing to an accident, becoming a hazard to himself/herself as well as to others.

Air³ Limited has a responsibility to manage the health, safety and welfare of its employees and this includes reviewing the impact of stress at work. In order to manage stress in the workplace the HSE's management standards for stress shall be applied.

These cover the primary sources of stress at work:

Demands – workload, work patterns and the work environment;

Control – how much say the employee has in the way they do their work;

Support – the encouragement, sponsorship and resources provided by the employer, management and fellow employees;

Relationships – includes promoting positive working, the avoidance of conflict and dealing with unacceptable behaviour;

Role – whether the employee understands their role and conflicting roles are avoided;

Change – how change is managed and communicated.

Management and supervisory staff should be aware of, and look for, the symptoms of stress in individuals and in groups. Equally any employee who may strongly suspect that a fellow employee or they themselves are being affected by stress should refer this to the appropriate manager who will arrange for the person to be assessed and/or monitored.

Air³ Limited's policy will regularly review each employee's work performance and workload. Employees will be given every chance to air their views and grievances at these reviews.

39 Health Surveillance

Operatives may sometimes need to use certain substances and materials that may pose risks to their health. In addition they may carry out activities or work in environments which may equally affect their health.

Further to any COSHH, noise, vibration or other assessments that Air³ Limited carry out, which will require the implementation of applicable control measures, health surveillance will be implemented where the assessment or legislation requires it to ensure that personnel's health is maintained monitored.

40 Well-Being and Mental Health

The Well-being Policy will be reviewed each year, or more frequently if required, to ensure that it is effective and up to date.

The policy will be amended where required and all employees informed of any amendment. A copy of the policy will be available to all employees. Each workplace will hold a copy of the policy.

The well-being statement of intent will be displayed on a health and safety notice board and a copy held at each work location.

To implement an effective health and well-being strategy, Air³ Limited will engage and work with its employees at different levels across the organisation.

Air³ Limited will engage with external support groups and campaigns to identify how we can commit to as a business to reduce stigma and discrimination.

Air³ Limited will provide support and resilience across the organisation aiming to develop a culture that is inclusive, open, and supportive of people experiencing mental ill-health. Evidence suggests there are five steps we can all take to improve our mental well-being. We will support and guide our workforce towards these steps with an aim to make them feel happier, more positive and assist them to live and work productively:

- Connect – connect with the people around you: your family, friends, colleagues and neighbours. Spend time developing these relationships.
- Be active – you don't have to go to the gym. Take a walk, go cycling or play a game of football. Find an activity that you enjoy and make it a part of your life. Evidence suggests that taking regular exercise has the same effect as taking mild to moderate anti-depressants.
- Keep learning – learning new skills can give you a sense of achievement and a new confidence.
- Give to others – even the smallest act can count, whether it's a smile, a thank you or a kind word. Larger acts, such as volunteering at your local community centre, can improve your mental well-being and help you build new social networks.
- Be mindful – be more aware of the present moment, including your thoughts and feelings, your body and the world around you. Mindfulness can positively change the way you feel about life and how you approach challenges. The use of 'mindfulness' apps like Headspace are encouraged.

41 Managing Sickness

Research shows that long periods out of work can lead to worse health, while working can be good for physical and mental health and well-being.

In some cases the longer personnel are absent through illness, the lower the chances of them returning to work. Work may help people recover more quickly from illness.

To this end, Air³ Limited will endeavour to help employees back to work as soon as possible.

The Company will ensure that it maintains regular contact with the employee during their absence in accordance with the HSE recommended guidance document HSG 249, and implement the Company's sickness policy.

The employee will be required to inform the company of their intended absence and, where applicable, provide a 'fit note' from their Doctor.

A plan to return to work will be implemented with professional advice sought if required. This plan will be agreed with the employee and progress will be monitored.

Where necessary, we will discuss changes to support an employee's long-term prospects of employment following sickness absence.

On return to work the employee will receive a 'return to work' interview. Monitoring of sickness absence and any effects from illness/injury will be agreed to ensure that any reasonable adjustments to the working environment/activities can be accommodated.

42 Asbestos

Asbestos represents a significant risk within the work environment Air³ Limited shall take such steps as are necessary to control this risk as it affects its undertakings.

43 Work Where Asbestos May Be Encountered

Steps will be taken to identify and locate materials in premises likely to contain asbestos.

Employees and any others who are likely to come into contact with asbestos will receive awareness training which will include emergency procedures, decontamination procedures and safe working practices.

Contractors who work in the premises will be trained in asbestos awareness and will be made aware of the location of any asbestos-containing materials prior to the start of any work.

Before any work is carried out on the fabric of any premises, a specific and more intrusive investigation may be required to ensure that any concealed asbestos-containing materials are identified.

No works that will disturb asbestos-containing materials shall be undertaken under any circumstances.

Should suspected asbestos-containing materials be discovered during any works then all works will be stopped until specialist advice is sought.

Any asbestos removal works will be carried out by trained asbestos contractors and all waste will be disposed of in accordance with current waste regulations.

44 Underground Services

Air³ Limited will ensure all information on existing underground services is obtained before any excavation work commences.

Full consultation will be carried out at all stages with representatives of the various service authorities to agree any precautions required.

Only trained operatives will physically locate and mark all services by means of locating equipment and hand dug trial holes.

Operatives should not assume that the plans are accurate or to scale, but use them as an indicator for position, layout and numbers of services.

In addition, reliance is not placed upon locating equipment alone. Physical indicators such as previous excavations, junction boxes, manholes etc. will also be used.

45 Electricity – General

The use of electricity in the workplace is widespread and represents a significant risk of personal injury and fire.

No company employee is to undertake electrical work on any equipment or system within the workplace unless those employees hold the relevant qualifications and have been authorised.

Any faults or hazards related to electrical equipment or installation should be reported to supervisors/managers for action.

46 Management of Electricity in Premises

Air³ Limited will ensure that electrical installations are subject to inspection, testing and where required maintenance. Managers responsible for premises will obtain certification to ensure that any permanent or temporary (if required) installations are on record and in date.

Periodic Portable Appliance Testing will be carried out for all electrical equipment as suggested by guidance or specified by the company's insurance company, whichever is the shortest period.

All personnel should visually inspect any electrical equipment under their control for suspected visual defects and report these for corrective action.

Where the employee is facing problems in powering equipment, (i.e. lack of sockets), they should report this and not attempt to resolve the situation themselves by adding extension leads.

47 Electricity – Construction

No work will be undertaken by any Air³ Limited employee on or in the vicinity of live electrics. Such work is only to be carried out by qualified and authorised personnel, subject to a permit to work.

Where permanent electrics are required to be disconnected or isolated, our managerial and supervisory staff are responsible for obtaining the necessary certification.

Managerial and supervisory staff are responsible for obtaining information on and arranging for the protection of any existing or temporary buried, overhead or surface laid electrics. Managerial and supervisory staff are responsible for ensuring that adequate power distribution is provided to locations where it is required, subject to contractual agreement between parties on site. This will include ensuring provision of sufficient sockets for battery charging.

Only 110V equipment (or less) will be used on any company site for power tools. Any specialist equipment which operates at higher voltage and for which an 110V alternative does not exist may be used only subject to specific assessment and implementation of the relevant control measures.

Portable and transportable equipment shall be inspected and tested as frequently as required. The frequency will depend on the environment in which the equipment is used, the conditions of usage and how carefully it is handled.

Equipment used on site will normally be inspected at least every three months and equipment used in an office environment will be inspected at least every 12 months.

Temporary electrical installation to site offices and welfare facilities will be inspected every three months.

48 Gas

Gas represents a significant risk to both Air³ Limited personnel and to others that it may affect. The management of gas safety is therefore an area that requires close attention.

49 Control of Gas in Premises

The Company will ensure that its gas equipment and storage is regularly inspected and maintained in accordance with guidance and supplier advice. Such work will only be carried out by a competent contractor/individual.

Documentation relevant to such work will be kept on record.

50 Emergency Procedures

Whilst all reasonably practicable steps shall be taken by Air³ Limited to ensure its activities take place as planned, within the boundaries set by this policy and any relevant assessments, the Company recognises that emergencies can occur and that these need consideration and management action in order that control of a situation where its employees may be at risk.

Written emergency procedures for reasonably foreseeable incidents will be assessed at all workplaces.

All employees will be informed, instructed and where necessary, trained in the emergency procedures. These procedures will be practised regularly and records will be maintained.

Appointed persons will be identified to take control in the event of an emergency incident.

51 Fire Prevention and Evacuation Procedures

A fire risk assessment will be completed at all workplaces under the control of Air³ Limited.

Appropriate measures will be implemented at all workplaces, including adequate:

- Means of fire detection;
- Means of raising the alarm in the event of a fire;
- Firefighting equipment;
- Emergency lighting;
- Emergency routes and exits.

Appropriate measures will be implemented for regular maintenance, servicing and testing of fire prevention equipment. Fixed electrical installations will be inspected and tested periodically.

Procedures will be produced at all workplaces detailing action to be taken in the event of a fire including on discovering a fire, hearing a fire alarm, evacuation routes and assembly points.

An appointed person will regularly inspect the designated evacuation routes for obstructions.

Fire plans will be displayed around the building(s). Emergency routes and exits will be indicated by signs.

Where disabled persons use the workplace, specific arrangements will be made to ensure they can escape in an emergency.

All employees will be informed, instructed and where necessary, trained in fire prevention and evacuation procedures (action to be taken, fire alarm, types and use of fire equipment). These procedures will be practised regularly and records will be maintained.

Fire marshals will be appointed and trained in fire prevention and evacuation procedures.

52 First Aid and Accident Reporting

All employees, contractors and visitors must report all accidents resulting in injury to any person (not just employees) or damage to any property.

Nominated 'suitable person(s)' - trained first aiders or emergency first aiders - will be provided at all workplaces to administer first aid treatment. The numbers required will be determined by a suitable and sufficient risk assessment.

Adequate first aid equipment will be provided at all workplaces under the control of the first aider to include:

- First aid kits;
- Eye wash stations;
- A suitable place or room for the administration of simple first aid procedures.

All employees, contractors and visitors must report all injuries and accidents in accordance with company policy and ensure details are recorded in the workplace accident book. The book may be hard copy or electronic.

Management must report serious injuries, incidents or diseases occurring at or as a result of activities at the workplace, as required by current legislation.

Fatal and specified injuries can be reported by phone and online to the HSE Incident Contact Centre.

Less serious accidents where a person is away from normal working duties for at least seven days as a direct result of a work related accident can only be reported using the F2508 form and must be reported within 15 days of the accident.

Reported accidents will be investigated to ensure that protective and preventive measures are reviewed and controls are amended or improved as required to prevent recurrence. Accident reports will be prepared to comply with legislation and where necessary to prepare for litigation.

The Enforcing Authority must be informed when:

- Any person dies as a result of or in connection with work;
- Any person suffers a specified injury or disease as a result of or in connection with work;
- A person is incapacitated for work for more than seven consecutive days due to an accident at work. This must be reported within 15 days;
- Any person not at work (visitor, member of public, etc.) is injured as a result of an accident at a workplace and requires treatment at a hospital.

53 Welfare Facilities

Suitable and sufficient welfare facilities will be available at all workplaces for all employees, contractors and visitors, including:

- Toilet facilities, including facilities for the disabled;
- Washing facilities;
- Facilities for rest and to prepare and eat meals, including means for boiling water (to include adequate seating with backs);
- Drinking water.

In addition:

- Accommodation for clothing;
- And where appropriate changing rooms and lockers.

All facilities will be maintained to a satisfactory standard, with regard to:

- Accessibility
- Temperature
- Ventilation
- Lighting
- Cleanliness/hygiene

Before work commences on site, arrangements must be made for convenient sanitary facilities for the use by operatives throughout the duration of the works.

Where welfare facilities are to be shared on site between different contractors, arrangements and procedures for the proper use and maintenance of those facilities must be developed and communicated to all parties. This will be detailed in the induction procedure.

54 Personal Protective Equipment

The Company recognises the use of PPE as part of its strategy to control risk. PPE will be selected following risk assessment identifying its need.

The selection will be based on the PPE's ability to afford the best protection and shall be provided free of charge, to all personnel requiring it to carry out their allocated tasks.

Air³ Limited will ensure that suitable and adequate quantities of PPE are available at all workplaces and used appropriately.

From 06 April 2022, employers will be obligated to provide personal protective equipment, not only to employees but also to workers who may be risking their health or safety while at work. This amendment to the regulations now extends the duty to workers, who are also classified as a 'limb (b) worker' under employment law. A 'limb worker' is registered as self-employed but provides a service as part of someone else's business.

Personnel will use issued PPE fully and correctly and shall report any loss or damage.

All PPE shall be personal issue.

55 Protection of the Public and/or Non-Employees

Arrangements will be made to ensure, so far as is reasonably practicable, that no member of the public or non Air³ Limited employee(s) is exposed to risks to their health and safety as a result of our activities.

In carrying out any activity in the presence of the public or non-employee, all personnel representing the Company shall ensure that the safe system of work takes adequate account of the public and non-employee and, that suitable and sufficient precautions are in place to protect them.

56 Employment Status

Under current legislation, specific reference is made to the working status of employees (self-employed, agency worker, etc.).

Air³ Limited shall ensure that regardless of employment status, all persons working on behalf of the Company shall be considered to be an employee and consequently afforded the duty of care due to them under current health and safety legislation.

Likewise it is expected that they act in accordance to the duties of employees and shall therefore not place themselves or others at risk as a result of what they do, or omit to do, and furthermore that they shall cooperate with the Company on health and safety matters.

57 Temporary/Short Contract and/or Agency Workers

Air³ Limited shall provide employees under a fixed-term contract, or employed by an employment agency to work in the company's premises, with information on any specific qualifications or skills required by employees to carry out work safely.

The Company shall provide any health surveillance where the nature of the work requires it.

This information will be provided before the employees concerned commence their duties.

In the case of an employment business employee, the aforementioned information shall be supplied to the employment business. It is expected that, in line with current legislation, the employment business concerned shall ensure that the information provided is given to the relevant employees.

58 New or Expectant Mothers

Any employee is required to notify the company (in writing) that she is pregnant, has given birth within the previous six months, or is breastfeeding.

She will also be required to provide the company with a certificate from a registered medical practitioner or a registered midwife showing that she is pregnant.

Once this is confirmed, Air³ Limited will conduct a review of her current work, specific risk assessment and implement any changes/control measures to protect her unborn baby.

This assessment will take into account the following considerations:

- Long working hours;
- Night-time working;
- Stress;
- Noise;
- Violence from customers;
- Exposure to toxic substances, e.g. lead, pesticides, mercury etc;
- Radiation;
- Manual handling.

This assessment will be reviewed at regular intervals by her manager or supervisor, or as/when the employee requests it.

Air³ Limited will also provide suitable facilities for pregnant and breastfeeding mothers to rest while at work.

59 Employment of Personnel with Disabilities

A disability is defined as having a physical or mental impairment that has a substantial or long term negative effect on the ability to do normal daily activities.

To this end, the Company will endeavour to promote the employment of disabled people, identifying suitable opportunities wherever possible. The Company will also ensure that its employment practices tackle disability discrimination and promote disability equality.

Air³ Limited will provide the necessary support, assistance and care to disabled employees. When an existing employee becomes disabled, we will make every reasonable effort to continue to provide suitable employment in the same job or suitable alternative job. Furthermore, if necessary, we will provide relevant training or re-training.

60 Work Experience Placements

Air³ Limited recognises that the exposure to work provided by placements is a significant step in preparing young people for adult and working life. It provides an opportunity to foster an early understanding of the importance of health and safety and to influence the attitudes of the future workforce.

The Company will liaise with the Local Education Authority (LEA) or establishment work placement advisor to ensure the successful management of health and safety on work experience placements and the provision of a safe and supportive environment for the learner.

Where we accept students above the minimum school leaving age (MSLA), they will be considered a young person and the risk assessment reviewed accordingly - see separate section.

Where we accept students below the MSLA, the risk assessment will be reviewed to ensure suitable controls are in place and that the key findings have been communicated to the work placement officer and parents or guardians.

The Company will ensure that the controls reflect that students below the MSLA are not entitled to exemptions from the young person working restrictions, but temporary young worker status may be granted in cooperation with the work placement officer under the Education Act for school years 10 and 11 who would otherwise be prohibited by Child Employment Legislation from engaging in the restricted activities.

61 Lone Working

A lone worker is defined as an employee who performs an activity that is intended to be carried out in isolation from other workers and/or without close or direct supervision however; there are circumstances where 'any situation or location in which someone works without a colleague nearby; or when someone is working out of sight or earshot of another colleague' may be also considered.

There is no general prohibition on a person working alone. There are however specific instances where legislation requires more than one person to be involved in the operations or activity and circumstances where either the location or the nature of the work is unsuitable to a lone worker.

It must be established whether lone working is likely to occur as part of an employee's working conditions.

Risk assessments must be carried out and control measures put in place prior to the lone work commencing. Part of the method of work should include communication as an element of remote supervision. Only employees who display a high level of competence in their given tasks should be involved in lone working.

In certain cases lone working is not permissible and the worker will be physically supervised. This includes young people those undergoing training and other potentially vulnerable employees are not suitable.

62 Alcohol and Drug Misuse

Alcohol or drug misuse by employees or contractor(s) working in Air³ Limited premises (including supervisory and management staff) can adversely affect the health and safety of themselves or others in the workplace.

Therefore, it is the policy of Air³ Limited that alcohol and/or drugs (including legal highs) are prohibited in the workplace or whilst representing the Company.

Any persons known to be, or strongly suspected of being affected by alcohol and/or drugs must be referred to the appropriate supervisory or management representative who will arrange for the person to be removed from the workplace.

63 Smoking

Smoking is prohibited throughout the entire workplace with no exceptions. This includes company vehicles. This policy applies to all employees, contractors, or visitors.

It is an offence to smoke or permit smoking in a smoke-free area. Anyone seen smoking in a smoke-free area should be reported to a supervisor or manager.

“No Smoking” signs of the appropriate size and containing the information required by the relevant regulation will be clearly displayed at or near the entrances to smoke-free premises, public spaces and within vehicles.

64 Construction, Design and Management 2015 (CDM)

Legislation places a responsibility on all organisations that are in control of premises to ensure that those premises are safe for anyone using them. This may require regular maintenance work which itself may often be considered to be construction work, but also specific construction to be carried out

Air³ Limited will ensure that it complies with the requirements of the Construction (Design and Management) Regulations 2015 dependant on the role(s) it is undertaking (Client, Principal Designer, Designer, Principal Contractor, Contractor).

The Regulations cover the management of health and safety from concept through to demolition including hazard identification and control, following the general principles of prevention set out in the Management of Health and Safety at Work Regulations 1999 - Eliminate, reduce, inform, control.

There are five key duty holders in The Construction (Design & Management) Regulations 2015 (CDM).

These are:

- The Client
- The Principal Designer
- The Designer(s)
- The Principal Contractor
- The Contractor(s)

65 Responsibilities when acting as a Contractor

Contractors have a responsibility to ensure that their workers and any contractors, including self-employed sub-contractors, employed manage and control health and safety risks. In order to achieve this, a contractor must:

- Address the client's requirements, any pre-construction information provided by the Principal Designer and relevant parts of the construction phase plan and any other requirements provided by the Principal Contractor when planning work, for example this may be information about buried services.
- Ensure those carrying out the work have the right skills, knowledge, training, experience and supervision.
- Ensure those carrying out the work have the right plant, tools, equipment, materials and personal protective equipment.
- Pass on relevant information and instructions to workers. This could be done by briefing workers and, for higher risk tasks, using a safety method statement which outlines the planned method, sequence and control measures.
- Ensure that workers comply with the site rules.
- If required, coordinate the work with those of other contractors and the Principal Contractor.
- Agree with the Principal Contractor the arrangements for exchanging information to allow communication and coordination with other contractors to manage health and safety.
- Ensure workers receive a site induction.
- Allow workers sufficient time to prepare and carry out the work.
- Inform the Principal Contractor of any intention to sub-contract elements of assigned work.

66 Environment Control

Air³ Limited is committed to effectively managing all the environmental impacts of its activities through compliance with legislation, industry good practice and company policy.

The Company recognises the need to operate the business in a manner which reflects sound environmental management practices and will balance its business aims with the need to protect the local and global environment. The Company environmental policy must earn the confidence of employees, customers and the general public by demonstrating a commitment to comply with all relevant environmental legislation and minimise pollution, resource use and waste through the continual improvement of environmental performance.

Appropriate arrangements to protect the environment will be put in place at all workplaces, including:

- Approved storage and use of raw materials and substances;
- Waste minimisation, promoting re-use, recovery and recycling;
- Compliance with site waste management plans where applicable;
- Identified waste disposal routes under Duty of Care and the Hazardous Waste Regulations;
- Monitoring and review of environmental performance.

67 Pandemics and Epidemics

Air³ Limited will as far as possible plan for and make advance preparations for the possibility that its operations will be affected by an epidemic or pandemic. In the event of an epidemic or pandemic, Air³ Limited will, as far as possible:

- Assist its clients, staff, volunteers and others, as relevant, to minimise their exposure to the illness concerned.
- Encourage and assist those who have reason to believe that they are at risk of contracting the epidemic or pandemic to obtain a diagnosis.
- Support employees, volunteers, contractors and clients to take reasonable precautions to prevent infection or contagion.
- Provide standard precautions such as personal protective equipment (e.g. masks, soap, and gloves).
- Maintain its services and operations throughout the period of concern.

In the event of an infectious disease being declared an epidemic or pandemic, Air³ Limited requires people covered by this policy to follow the guidance recommended by the World Health Organization, UK Health Security Agency and Office for Health Improvement and Disparities etc.

For the purpose of this policy, infectious diseases mean diseases caused by pathogenic microorganisms, such as bacteria, viruses, parasites or fungi; the diseases can be spread, directly or indirectly, from one person to another. This policy is focused on infectious diseases that are declared to be an epidemic or pandemic. We will always follow the advice of the UK Government, Medical experts and the World Health Organisation as well as the HSE. We will ensure that we manage any misinformation and only follow and discuss trusted sources of reliable advice.

68 Behavioural Safety

Air³ Limited recognises that a systematic consideration of human factors is an essential ingredient of effective health and safety management. Human factors include environmental, organisational and job factors, and human and individual characteristics which influence behavior at work in a way which can affect health and safety.

Our approach to assessing the impact of human factors involves:

- Establishing what safe behaviours are, and what behaviours are deemed to be unsafe.
- Thinking about relevant jobs, individual and organisational aspects.

- Addressing human factors in risk assessment, during accident investigation, in design and procurement and in day-to-day operations.
- Recognising the effect of complacency and developing strategies to address this high-risk condition.
- Ensuring we support our personnel through information, instruction, and behavioral safety training.
- Involving the workforce and their representatives.
- Selecting from a range of effective control measures.

Opportunities to implement this approach are sought in the following areas:

- During risk assessments.
- When analyzing incidents, accidents and near misses.
- In design and procurement.
- Training needs analysis.
- In certain aspects of day-to-day health and safety management.

Air³ Limited recognises that the challenge of managing the risks to and from people at work must remain a continuous focus of our organisation. Improving health and safety cannot rely just on improvements in technical and systematic factors, it must address some of the important 'people' issues too.

69 Records and Archiving

Records will be maintained of all necessary health, safety and environmental documentation. This will include:

- Health, safety and environmental policy;
- Procedures documents;
- Risk assessments;
- Method statements
- COSHH assessments;
- Statutory documentation (inspections, reports etc.);
- Accident book;
- Training records
- Other relevant health, safety and environmental documents.
